Frontend Development

WordPress Design

REFERENCES

Provided upon request.

SUMMARY

A passionate Web developer with over 4 years experience in developing and maintaining web based applications. Known for my hardworking ethic and exceptional people skills.

WORK EXPERIENCE

WEB DEVELOPER

E-Plan Namibia

2022 - Present

I developed and maintained E-Plan micro-services, managed version control with Git, and rewrote the application in TypeScript. I handled customer queries professionally. Additionally, I created APIs using Node.js and Express.js and developed new features for eplan.com.na using React.js.

FREELANCE WORK

Working on Projects for clients

2019 - Present

- WordPress Design and Development
- Coded in Java during my time at university and completed a couple of projects.
- Website back ups and server migration
- Front end (ReactJS & NextJS) and back end development (Express JS, Supabase, MongoDB, MySQL)

RECENT PROJECTS

- React - [Admin dashboard](#) with a MongoDB and express back-end
- NextJs - [Restaurant ordering e-commerce](#) application with a Supabase back-end to allow emails and storage
- React - [B2B Dashboard](#) for managing orders and clients
- React - [Car catalog website](#) for looking at car specs and how different cars look.
